

# EPOXY INJECTION

## MYTHS & MISUNDERSTANDINGS

Epoxy Injection: Myths and Misunderstandings is a presentation designed for contractors, engineers, and restoration professionals who already have experience with epoxy injection and want to better understand what truly drives successful results. Rather than covering basic fundamentals, the presentation focuses on common mistakes, persistent myths, and frequently misunderstood aspects of the injection process that can negatively impact performance

### About the Speaker:

Robert Trout is President of Lily Corporation, a manufacturer of proportioning dispensers and specialty hardware for concrete repair, with over 30 years of industry experience. He is a frequent ICRI presenter, has taught domestically and internationally, and contributed to cold-weather epoxy injection research. He holds a BS in Business Administration.
